

Plant Pathology 290
Graduate Seminar Series
Spring 2017

Seminars: Mondays 9:00am – 9:50am
115 Hutchison
CRN 85870

Date	Speaker	Title
April 3	Dan Kluepfel Dept. of Plant Pathology UC Davis	The Genetics, Genomics, and Pathology of Developing Disease Resistant Walnut Rootstocks
April 10	Jared M. LeBoldus Botany and Plant Pathology Oregon State University	lecRLKs: Mediators of Innate Immunity in a Forest Tree
April 17	Kari Arnold Dept. of Plant Pathology UC Davis	Plants + People = Problems. A Story (involving viruses in grapevines) of How I Became a Doctor
April 24	Doug Cook Dept. of Plant Pathology UC Davis	Ecology and Community Genomics of an Important Crop Wild Relative and its Microbes as a Prelude to Agricultural Innovation
May 1	Steve Koike U.C. Cooperative Extension Monterey County	County-Based Plant Pathology: A Novel Means of Doing Extension
May 8	Tadeusz Wroblewski Genome Center UC Davis	Early Events in the Signaling of NLR Pathogen Receptors in Plants-A Lesson from Genome-Wide Functional and Structural Analyses
May 15	Enrico Bonello Dept. of Plant Pathology The Ohio State University	A Conceptual Framework for Solutions to Black Swan Events in Forest Health
May 22	Bob Blanchette Dept. of Plant Pathology University of Minnesota	Ethnomycology: Historic Uses of Forest Fungi
May 29	Holiday	Holiday-No Seminar
June 5	Jim Correll Dept. of Plant Pathology University of Arkansas	Molecular Challenges in Applied Plant Pathology

To schedule a meeting with the speaker please contact: Thomas Gordon: trgordon@ucdavis.edu, or Jessica Padilla: jepadilla@ucdavis.edu
